Final Result: Compliant

### Conclusion:

This was a follow-up inspection, due to a complaint completed via email and pictures with Executive Director Amber Vanleuken.

The complaint was concerning a 170lbs Great Dane Mastiff (Echo) currently housed at the facility.

The formula to calculate minimum space requirements is found in 8 CCR 1202-15 Part 12.

The calculation break down for Echo: = 60 inches + 6 = 66 x 66 = 4,356 /144 = 30.25 (base Sq Ft requirement) X 1.5 (5 to 30 days) = 45.375 Square Ft. required. Echo's current enclosure measures 5' W x 12' L = 60 Square Ft. provided.

At the time of this inspection; Echo's enclosure meets PACFA requirements. No violations were discovered; Ark - Valley Humane Society is in compliance. The document was emailed.
